

Ecessa Insight Release Notes

Version: 3.0.3

Release: 2017.07.05

Revision 1.0: 2017.07.05

Changes

Monitoring

- For hardware failover devices the monitoring services will only monitor the active devices

[Additional Information](#)

Additionally when viewing the monitoring information for the idle device it will retrieve the monitoring information of the active device at the time.

Sites

- Ecessa Insight site monitoring dialog will contain hardware failover status information retrieved from the live site
- Ecessa Insight will display restore points for all associated sites when displaying a site with hardware failover enabled
- Ecessa Insight will show only the active unit for Hardware Failover sites
- Ecessa Insight passive monitoring of sites will recognize when hardware failover sites have failed over and will update the database
- Configurations pushed to Ecessa Insight will be parsed for Hardware Failover information

[Additional Information](#)

The idle site will be created in the cloud, if necessary, and the sites will be associated as a Hardware Failover site. The site pushing up the configuration will be marked as the active site.

Fixes

Users

- Account admin can remove themselves from a group and not be able to add themselves back to that group via the users page
