

Ecessa Firmware Release Notes

Version: 11.1.1

Release: 2020.04.03

Revision 1.0: 2020.04.03

Improvements

WAN Virtualization

- VPN will be globally enabled by default

Changes

Network

- Network interface interrupt throttle rate default has been changed to dynamic on supported devices

Fixes

Hardware Failover

- Global Aliases are not replicated to idle device

Logging

- IDS/IPS logs may disappear before they are rotated

Update

- Updating many times between versions on a device with an SSD or multiple partitions can fail in some cases
